

Mining Recruitment

The Applus+ Group is an internationally recognized [mining support services](#) company including [mining engineering](#) and recruitment. We exemplify international best practices in terms of safe working practices towards our workforce, contractors, and clients and count on a wide experience in providing mining international recruitment for major projects in all continents.

THE Applus+ SOLUTION

We offer a comprehensive range of mining employment services, technical inspection, and mining equipment services, and we continually strive to develop and improve our services to be the trusted partner of choice for mining engineering services to the industry around the world.

Applus+ has secured numerous long-term contracts and built quality relationships with many of the world's most distinguished mining companies in both large and small mining projects.

We have built long-term partnerships by tailoring our mining recruitment services to the requirements of any business as they change over time. Applus+ has specialists in mining inspection, testing, mine safety monitoring, statutory equipment inspection, and project quality assurance. Therefore, mine construction quality and safety management is successfully integrated into a single management framework offered in our mining workforce solutions. We are also able to help clients move mining personnel around the world by organizing work visas and travel arrangements.

Target customers

This service is aimed at the Mining Project area delivery, the construction internal area, and the Logistics and Supply chain expert seeking operational and project area support services.
